Roll No : 127 Batch : S23

Network Lab

Assignment No. 2 Install and configure   the NS2.

Aim: Install and configure the NS2 and write a TCL script to display welcome message

Output:

```
root@DESKTOP-0NTJABS:/mnt/c/Users/lab1003/Desktop/CN_S23_127#
root@DESKTOP-0NTJABS:/mnt/c/Users/lab1003/Desktop/CN_S23_127# ns ex1.tcl
hello,first ns2 program
root@DESKTOP-0NTJABS:/mnt/c/Users/lab1003/Desktop/CN_S23_127#
```

Conclusions: The network assignment on NS-2 equips us with a powerful tool for simulating network behavior.We likely grasped optimizing network protocols and configurations without the risks associated with real-world deployments. scenarios in a controlled environment. This newfound skill is invaluable for designing, troubleshooting, and the fundamentals of working with NS-2, a network simulator that allows you to model and test various network
